Company: Busquedas IT

Location: Montevideo

Category: computer-and-mathematical

We are looking for a Senior candidate with technical strength in ROR, to join a project related to the management of communication in the rental market, for USA.

The project uses Rails + MySQL for the server. The frontend is in React and is available only in the browser.

The hosting is on Google Cloud, using Cloud SQL, App Engine, Cloud Tasks, Cloud Build, and a few other things. It also uses Google Firebase to notify the web application when new messages arrive.

We maintain many API integrations with third-party services. Since we are a text messaging application, we integrate with three SMS messaging providers.

We also integrate with 5 property management systems.

4 years of experience as a backend developer using ROR

Advanced English

The opportunity to join a team with growth prospects and work on interesting projects for American clients in English.

Contribute to multicultural teams, with a high level of English. Contractor, charging in american dollars.
